

Business requirement:-

The business requirements for a project aimed at "Identifying Patterns and Trends in Campus Placement Data using Machine Learning" would likely include the following:

- **Access to campus placement data:** The project would require access to data on student performance, qualifications, and job placement outcomes. This data would need to be collected, cleaned, and prepared for analysis.
- **Machine learning expertise:** The project would require individuals with expertise in machine learning, data science and statistical analysis to develop and implement the algorithms and models needed to analyze the data.
- **Data storage and management:** The project would require a robust and secure data storage and management system to store and organize the large amounts of data used in the analysis.
- **Infrastructure for model deployment:** The project would require infrastructure for deploying the models and algorithms developed, including hardware, software, and cloud-based resources.
